

Very complex to find cyber criminals: DGP

► From P 1

Singh said that people need to be told pros and cons of 5G. "Although 99.9% of any technology is always beneficial for humans and society at large, there is a small minority of people who use technology negatively," he said.

Singh said that technology is always moving at a fast pace. "There is a possibility of amendment to the Information and Technology Act and a large number of sections will be included. The law will have to follow the technology," he said.

The DGP said that in physical crime, the scene of offence

“ There is a possibility of amendment to the IT Act and a large number of sections will be included. The law will have to follow the technology

Jaspal Singh | DGP

is known, the accused leaves his trace like face is captured on CCTV camera, but in digital crime, an accused may be sitting 25,000km away and it is very cumbersome and complex to find the criminal.

On drug mafia, Singh said that police have already seized large quantities of drugs and more action will be taken.
