Dear Sir/Madam,

As you are aware, Amrita University is conducting the First International Conference on Security of Internet of Things (SecurIT 2012) August 17 – 19, 2012 at Amrita University in Kerala, India. Along with the conference students are invited to take part in a secure coding contest sCTF 12.

It would be great if you could form a team from your esteemed college to take part in sCTF 12

The Participating teams need to clear a preliminary round before entering the final round of the contest and qualified teams will be offered free registration to attend SecurIT-2012. Interested students can email to contact@inctf.in

Students attending the conference can interact with internationally renowned scientists like Robert Kahn, one of the founding fathers of the Internet, Marvin Minsky, the father of Artificial Intelligence and many others.

The conference provides spectacular opportunities to students to apply directly for full funded openings to study abroad in European Universities in France, Italy, Germany, Portugal and Spain. Undergraduate, Graduate, Post Graduate and Faculty positions from 6 months to 10 months at universities mentioned above can be applied to during the conference.

For more information about the conference, please visit www.securit.ws

Please encourage your students to take part!

Thanks you for your help!

Sudheesh
