Guest Lecture

SUPERACID DERIVATIVES IN YOUR POCKET?

Lecture by Professor Ivo Leito,
University of Tartu, Estonia

ABSTRACT:

The major topic of this lecture will be to give an overview of the design of superacids and the measurement of their strength. Firstly the lecture will concentrate on acids and acidity to explain the background of superacids. Secondly, the lecture will focus on superacids. The lecture will be illustrated with different examples.

Venue : C 308

Time : 12 noon – 1PM

Date : **12th February 2015**
