Seminar on “NORMAL POLARITY ENANTIOSELECTIVE CATALYSIS USING N-HETEROCYCLIC CARBENES”

By *Prof. David William Lupton*, School of Chemistry, Monash University, Victoria 3800, Australia,
e-mail: david.lupton@monash.edu

Date	Time	Venue
06/03/2020 (Friday)	11:30 hrs	L202

Abstract: A broad and fundamental interest in catalysis is at the heart of all our research. Specifically we are intrigued by the ability to develop unknown reactions mainly in the areas of organocatalysis and transition metal catalysis.

All are cordially invited to attend the seminar
