

Summer Internship

BITS Pilani also runs a system of 2-month summer internships, under the supervision of the Placement Unit. Although the summer internships are not a part of the BITS Pilani academic curriculum, the Placement Unit has been facilitating the interview process for the same on the request of recruiters and the student body. The hiring process for summer internships takes place in the month of September-October, and February-March each year. Students join companies for the internships in mid-May (after their end-semester examinations) and continue till mid-July for a period of 8-10 weeks. Recruiters who are keen to participate in the summer internship process may get in touch with the [Placement Staff](#) for the same. Companies who are interested in taking students for the 6-month internship program may get in touch with the [Practice School Division](#) for the same.
